Handheld Tubing Straightener

TSHH-316 & TSHH-250

PATENTED TUBING STRAIGHTENER!

Shop the Entire AGS Tool Line!

Straighten Coil End by Hand

Feed Tubing Through Center Rollers Until It Appears on the Other side

Continue Feeding Tubing Through Working Back & Forth 2- 3x Until Entire Coil is Straight

3/16" or 1/4" HANDHELD TUBING STRAIGHTENER

This handheld tool allows you to straighten steel, stainless steel, aluminum or copper tubing for brake systems, fuel systems and more. Save time and money by using bulk coiled tube while still getting professionally straight results. Create better flow through your lines with no bends or irregularities. Much quicker and less expensive than bench mounted tubing straighteners and you get way better results than trying to straighten the tubing by hand.

- Works on Steel, Stainless Steel, Aluminum, Copper, Poly-Armour®, & NiCopp®.
- Insert a marker into one of the special ports to index you lines to ensure all your bends are on the same plane.
- Great for brake lines, fuel lines and more
- Easy to use!
